Croatian Geological Society is a voluntary professional association of geologists and persons interested in geology and natural heritage, including the institutions from the field of earth sciences.

Croatian Geological Society was founded on the 22nd of December 1951. First president of the Society was Prof. Marijan Salopek, Ph.D., vicepresident was Prof. Franjo Ožegović, Ph.D. and secretaries were academics Milan Herak and Ivan Jurković.

The Society through its activity promotes development and popularization of geology, promotion of professional and scientific work, wider geological knowledge and professional and scientific specialization of members. The Society also regularly organizes public scientific meetings, professional meetings, workshops, lectures of home born and foreign professionals, publishes scientific papers of its members, organizes congresses and professional geological excursions.

Engineering Geology Section

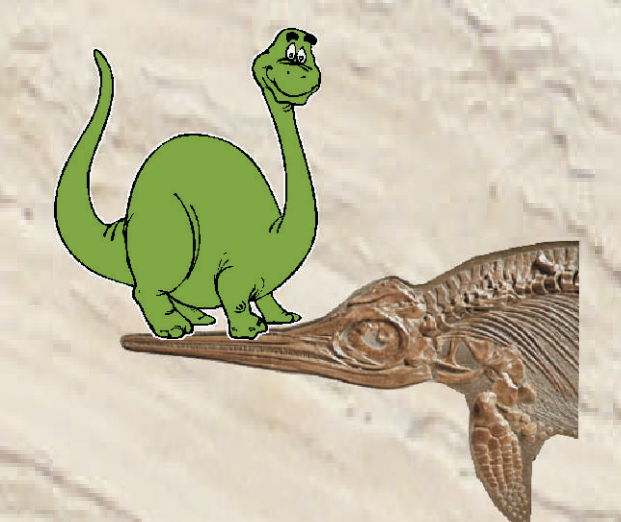

"Geologia Croatica" is a common scientific journal of Croatian Geological Institute and Croatian Geological Society. Publisher is Croatian Geological Institute. "News of Croatian Geological Society" is a journal of Croatian Geological Society, which the Society publishes independently twice a year. First number of "News of the Croatian Geological Society" was published in 1974. Through various articles published in "News of Croatian Geological Society", members are being informed about work and events in the Society.

Paleontological Section

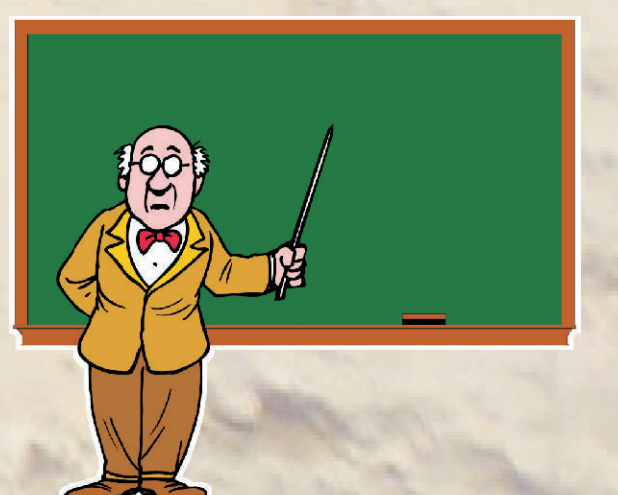

Geoheritage Protection Section

In each issue of the "News" various authors - members of the Society write about activities within certain Section of the Society, about professional travellings, participations on home (domestic) and foreign congresses and authors write the review of each activity. Every number of the "News" contains "Theme of the number". In that part of the "News" professionals from various fields of geology write about some topic in a popular but scientific way. The last article in the "News" follows scientific promotion of the members and publishes summary of the new master and doctor's thesis of the members.
